## SUMMARY

Full Stack Developer with professional experience building web and mobile apps using Java, Spring Boot, Angular, and React Native. I have spent my career working on the MCD Next-Gen government project, creating secure APIs, scaling backends, and digitalizing complex public workflows. Beyond enterprise systems, I design modern mobile apps using Expo and integrate generative AI tools like Gemini and Hugging Face. I focus on writing clean, simple code to deliver reliable software for high-traffic, real-world systems.

## TECHNICAL SKILLS

|           |                                                           |
|-----------|-----------------------------------------------------------|
| Languages | Java, C++                                                 |
| Backend   | REST APIs, Microservices, SpringSecurity, JWT, Hibernate. |
| Databases | PostgreSQL, MariaDB, Supabase.                            |
| Tools     | Git, SVN, Postman, Linux, CI/CD, Docker, AWS.             |
| Framework | SpringBoot, ReactNative, Angular.                         |

## PROFESSIONAL EXPERIENCE

### Software Engineer

#### Dev IT Ltd. (MCD OBPS Next Gen Project)

10/2024 – Present

- Worked on the OBPS Next Gen Project under MCD Delhi as a Full Stack Developer.
- Developed multiple modules and implemented end-to-end business workflows with REST API integration.
- Built Android application using React Native with integrated Email and SMS notification services.
- Implemented logging mechanisms and supported scalable deployment and performance optimization.

Tech: Java, Spring Boot, Angular, React Native, PostgreSQL, MariaDB

### Software Engineer

#### Act Global India Pvt. Ltd.

04/2024 – 09/2024

- Built scalable applications using Angular, Spring Boot, and React Native.
- Managed production deployments ensuring system performance and stability.
- Led a small team and mentored developers to improve delivery efficiency.
- Developed APIs and integrated multiple business modules.

Tech: Java, Spring Boot, Angular, React Native, PostgreSQL, MariaDB, AWS

### Software Developer

#### PS QuickIT Pvt. Ltd. (MCD OBPS Next Gen Project)

07/2023 – 03/2024

- Developed core modules including registration and services for digital building approval workflows.
- Integrated backend APIs with Angular frontend applications.
- Implemented Email/SMS notification services.

Tech: Java, Spring Boot, Angular, PostgreSQL

### Trainee Java Developer

#### MCD Civic Centre, Delhi. (MCD OBPS Next Gen Project)

01/2023 – 06/2023

- Contributed to backend modules including logging, notifications, and NOC systems.
- Assisted in API development, debugging, and testing.

Tech: Java, Spring Boot, PostgreSQL

## EDUCATION

|                                                             |             |
|-------------------------------------------------------------|-------------|
| B.Tech (CSE), Institute of Technology & Management, Gwalior | 2019 – 2023 |
| Senior Secondary (XII), CBSE Shivam Convent School, Patna   | 2017 – 2018 |
| Secondary (X), CBSE Kendriya Vidyalaya, Sonapur             | 2015 – 2016 |

## CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Cambridge English BEC Preliminary
- Java Programming Language – RGPV Bhopal

## Technical Projects

---

### **Jarvis AI — Multi-Modal Assistant APK**

#### **Mobile App Developer & AI Integrator | React Native, Expo, Supabase, Hugging Face APIs**

- Developed a single mobile app (APK) that combines text, image, video, and song generation all in one place.
- Connected the app to different Hugging Face AI models using APIs to process and display the generated media.
- Used Supabase to manage user sign-ins and securely keep track of the generated files and data.

### **TheAmreyBlog App & Automated Blogger Web**

#### **Full-Stack Developer | React Native, Expo, Supabase, JavaScript**

- Built a cross-platform mobile app using React Native and Expo to let users read and manage blog posts easily.
- Used Supabase to handle the database, store blog content, and keep user data syncing in real time between the app and the web.
- Connected the mobile UI to an automated blogging system so articles can be drafted and updated straight from the app.

### **XFEED — Local E-Commerce App & Web**

#### **Full-Stack Developer | React Native, Expo, Supabase, JavaScript**

- Created a platform designed to help local, physical shops digitalize their business and display their products online via mobile and web.
- Designed a simple, clean interface using Expo to make browsing products and navigating the shop smooth for customers.
- Used Supabase to manage the shop's inventory, live product listings, and user data.

### **Investment Analyzer Web**

#### **Frontend Web Developer | HTML, CSS, JavaScript, Gemini API**

- Built a lightweight financial tool using pure HTML, CSS, and vanilla JavaScript to keep the website fast and responsive.
- Integrated the Gemini API to analyze financial data and give users automated investment insights based on their inputs.

### **College Project Archive Web**

#### **Frontend Web Developer | HTML, CSS, JavaScript, Git**

- Built a clean portfolio page to organize and display a collection of interactive web pages and fun coding projects made during college.
- Focused on writing clean, responsive code so all the archived projects load quickly and work perfectly on both phones and desktops.
